

Module 1 - Instructions on conducting a session to determine the expectations of participants from the training course

1. Participants are asked to pick up a sheet of paper with a number (1, 2, 3, 4, 5) written on it.
2. Participants with the number 1 are grouped together, 2 together, and so on. In this way, 5 groups are formed.
3. Each group is provided with a blank A2-size paper, coloured pens, a pair of scissors, tape, a pencil, and an eraser.
4. The groups have to write or draw their expectations from the course using the stationery provided and by being as creative as possible.
5. Once the lists of expectations are complete, one person from each group is nominated by the other members to explain their expectations to the other groups.
6. The completed chart papers are pinned up on a board for participants to view at any time during the course.

Duration: 45 minutes

Commonly expressed expectations

- Learn how to design a social protection floor.
- Share and learn from the experiences of other countries in the area of social protection, especially on programmes, good practices, and challenges in implementation.
- Understand how to use the tools for assessing and calculating the cost of social protection schemes and measures and how to adapt the tools to different national contexts.
- Learn to analyse how the introduction of social protection measures impacts the fiscal space.
- Learn ways to convince and persuade the government to adopt the SPF.
- Better understand how to develop a social protection network and collaborate effectively with relevant stakeholders to develop national social policies.
- Understand how to design sustainable and politically acceptable policies and measures.
- Learn how to go ahead from social protection assessment to the implementation of policies.
- Replicate the assessment training in the respective countries.
